

# Network Development

Network Development is the process of finding the right match of providers in a certain market to decide if inclusion in your network would prove to be a win-win for all. From a group of chiropractors wanting to start a specialty network, to an insurance company looking to provide coverage in a previously untapped market, Network Development is the key to improving health and controlling costs.

---

Of ACR Consulting Services six core services, Provider Network Development is our backbone. Our experts have the proven experience to effectively and efficiently develop mutually beneficial network partnerships. Our staff is on hand to run Network Development projects covering all 50 states. Utilizing our proprietary tools, we track real time provider response and contract submission. Reporting can be tailored to suit any organizational needs. And, development time and costs can be cut by as much as 40%.

---

When it comes to Network Development, the experts at ACR Consulting Services are uniquely qualified to make a difference. Whether you are looking to build a small specialty network of physicians in your market or need assistance in expanding across the United States, we have the man power and experience it takes to make a new network come to be. We can scale at a pace that fits your plans and expectations. Our Network Development services include:

- Initial market research
- Value based contract modeling
- Identifying, contacting and educating providers
- Negotiating fee schedules and contract language
- Collect LOI's, LOA's and full agreements
- Writing narratives and exception letters
- Creating HSD tables for network requirements
- Credentialing
- Health care delivery
